INTRODUCTION

Welcome to Douse Laundry, your trusted partner in linen management excellence. With a passion for precision and a commitment to exceptional service, we specialize in providing top-tier linen solutions that empower businesses to thrive.

We understand that the right linen management can significantly impact your organization's operations, cost-effectiveness, and overall guest satisfaction. With our comprehensive suite of services, cutting-edge technology, and unwavering dedication, we aim to transform your linen management experience.

Revolutionizing Linen Management for Hotel Excellence

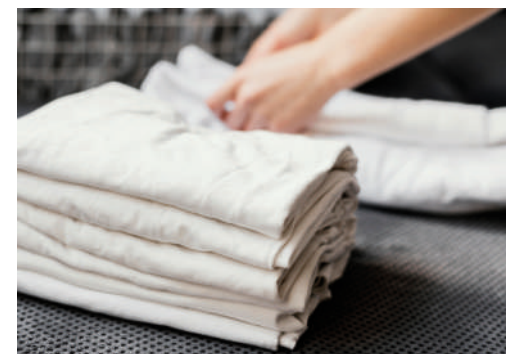

At Douse Laundry, we understand that excellence in hospitality hinges on the finer details, and one such crucial element is linen management. With a profound commitment to service, quality, and efficiency, we have embarked on a journey to redefine the linen management experience for hotels and resorts.

In the world of hospitality, linens are not just fabrics; they are the touchpoints that elevate guest experiences, ensure comfort, and reflect your brand's commitment to excellence. Douse Laundry Linen Management is here to ensure that every linen moment resonates with luxury, precision, and unparalleled convenience.

Our mission is simple: to seamlessly manage your linen operations, enhance guest satisfaction, and drive cost-efficiency, allowing you to focus on what truly matters—providing an exceptional guest experience.

With a dedicated team of experts, state-of-the-art technology, and a commitment to sustainability, we are poised to become your trusted partner in linen management, enabling you to deliver the best to your guests every day.

Welcome to the future of hospitality linen management with Douse Laundry. Discover how we can transform your linen operations and enhance your guest experience, one thread at a time.

WHY US

STERILISATION

The Dry cleaning processes and pressing of items using steam heat reaching 160 degrees Fahrenheit has been proved to kill germs and viruses.

ECO-FRIENDLY

Eco-friendly dry cleaning makes use of solvents that are not harmful or toxic. By eradicating the use of PERC, we use solvents and detergents that are not harmful to the environment.

GAS FIRE TECHNOLOGY

Our method decreases electricity consumption while also eliminating the high risk of heavy-duty boilers.

REVERSE OSMOSIS

A luxury for linen is to be bathed in RO-treated water. The soft water input increases the life of the fabric being laundered.

AUTOMATION

Our state-of-the-art technology from the laundry machine manufacturer, 'IFB' gives us the edge of automation and excellence.

QUALITY PRODUCTS

Superior inputs yield exceptional outputs; we employ top-tier technology and employ a soothing Douse Laundry detergent from Diversey to ensure excellence.

QUALITY ASSURANCE

At Douse Laundry, we adhere to stringent quality control measures to ensure the highest standards of cleanliness and customer satisfaction.

COMMITMENT TO SUSTAINABILITY

We recognize the importance of environmental sustainability and strive to minimize our carbon footprint.

CUSTOMER SATISFACTION

Customer satisfaction is at the core of our business. We value our clients and aim to build long-lasting relationships based on trust, reliability, and exceptional service.

HOTEL LAUNDRY PROCESS

Collection and Transportation

The collection of linen is done in the linen room and is collected separately, such as kitchen uniforms, dusters, etc. The linens are usually packed in a canvas bag called skips for transportation.

Arrival

On arrival the linens must be dealt quickly as possible to ensure fast turn around time for linen. There must be a separate section for guest laundry.

Marking

The marking may be temporary or permanent. For guest laundry, the initials of the guest as well as the room number help provide a clear identification and help in correct billing.

Sorting

Sorting is carried out according to the types of fabrics, items, and colors and is done to separate those articles that need dry cleaning from those that will go through the normal washing process.

Weighing

Weighing is carried out to conform to the capacity of the washing machine and to avoid repeated overloading that can cause the machine to breakdown, and underloading leads to the waste of detergent and water.

Washing

The process is designed to perform three basic functions.

- Removal of soil dirt
- Suspension of soil
- Discharge of soil from the machine and drain.

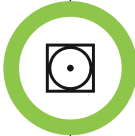

Rinsing

Once the wash cycle is completed. Rinsing is carried out at least twice. The purpose of this is to remove the residue of laundry agent and reagent.

Hydro-Extraction

It is the process of removal of excess water and moisture from the linen which has been washed.

Tumble Drying

This process is capable of making the linen absolutely dry , by blowing hot air. For articles that are likely to be damaged by heat there is an option of simple air drying.

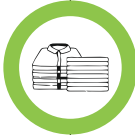

Finishing

After washing and drying of all the articles needs proper finishing like folding properly, or hanged in hangers.

Folding

Folding can be done in machines hands and in most cases carried out manually.

Airing

Airing is very much needed to protect the linens from mildew.

Storage

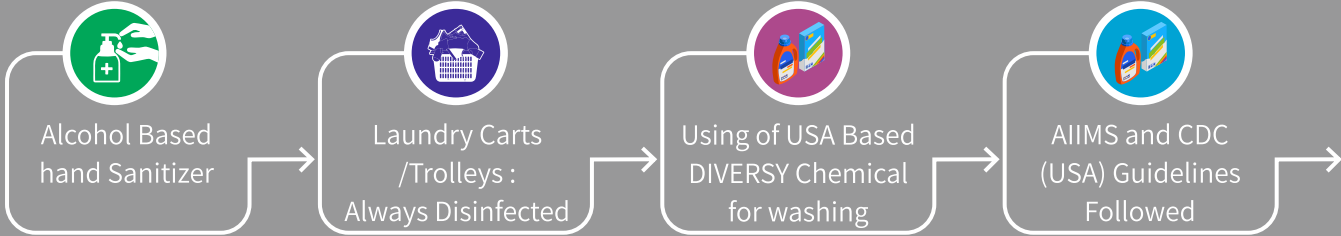

Storage should be properly done before delivering. Linens should be allowed to keep in specific period in the store for distribution.

Distribution

Now the lines are ready for distribution . The fresh linens are distributed to various departments through house-keeping.

OTHER IMPORTANT POINTS

The Laundromatique Washer Extractor combines outstanding performance with modern convenience. Powered by an Inverter Drive motor, it ensures high-speed extraction. Plus, it offers state-of-the-art convenience with a large display and Wi-Fi app control. Additionally, it includes smart features such as an Out of Balance switch to prevent excessive vibrations during wash cycles, user-friendly dosing, and an Auto Door Interlock for added safety.
